Global Ecology Data Repository

Overview

Welcome to Global Ecology Data Repository at data.globalecology.unh.edu.

Please visit us at http://globalecology.unh.edu about our research and contact the PI - Dr. Jingfeng Xiao (j.xiao@unh.edu) if you use our data or have any questions.

Fair Data Use Policy

We make our data products available to the research community as we believe that the dissemination of our data will lead to advancement in science. If you plan to use our data in a manuscript or presentation, we request that you inform us at an early stage of your work. You should ensure that your research does not significantly overlap with what we are currently working on with this product. In addition, if our data are essential to your work, or if an important result or finding depends on our data, co-authorship may be appropriate. You should inform us of your analysis and publication plans well in advance of the submission of a paper, give us an opportunity to read and intellectually contribute to the manuscript, and, if appropriate, offer co-authorship. **Contact**: Dr. Jingfeng Xiao (j.xiao@unh.edu)

Accessing data

The scientific data distributed on this data repository can only be downloaded with HTTP requests.

- Download individual data files directly from this website
- Download selected or all data files using software download manager browser extensions like DownThemAll!
- Use HTTP Linux commands such as wget or curl to download multiple files at one time
- Use a Windows version of wget
- Download data with another utility that supports HTTP requests
